

Samuel

Computer Science Undergraduate & Software Engineering Trainee

Calabar, Nigeria • samuel@example.com • GitHub / Portfolio

PROFESSIONAL SUMMARY

Dedicated and motivated Computer Science undergraduate at the University of Calabar with practical experience in software development, web technologies, and version control. Actively builds applications using Python, Java, JavaScript, HTML, and CSS, complemented by professional exposure through a software engineering Industrial Training (SIWES) placement. Proficient in developer tooling including Git, GitHub, Docker, and workflow automation.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, HTML5, CSS3
- **Tools, DevOps & Version Control:** Git, GitHub, GitHub Pages, Docker, Windows Subsystem for Linux (WSL 2), n8n workflow automation
- **Design & Digital Media:** Adobe Photoshop (graphic compositions, visual layouts, promotional materials)

PROFESSIONAL EXPERIENCE & TRAINING

Software Engineering Intern (SIWES Placement)

Industrial Training Program

- Commenced a professional Industrial Training placement focused on software engineering, logging technical tasks, and gaining exposure to industry development workflows.
- Applied software engineering principles and structured problem-solving to practical tech projects.

KEY PROJECTS

Personal Portfolio Webpage

- Designed, built, and deployed a responsive personal portfolio website showcasing development projects.
- Managed source code using local Git repositories, maintained a clean commit history, and published the live site via GitHub Pages.

Student Registration Portal

- Developed a structured student registration web page using pure HTML, featuring form input elements, tabular data presentation, and organized lists.

Workflow Automation & Environment Configuration

- Configured local development and containerization environments using Docker Desktop and WSL 2 Ubuntu.
- Implemented workflow automation logic using n8n nodes to streamline tasks.

EDUCATION

Bachelor of Science in Computer Science

University of Calabar

Relevant Coursework: Object-Oriented Programming (Java & Python), Data Structures, Web Development, and Software Engineering.
